

FISCAL YEAR 2026-2027 WATER AND SEWER RATES

The Groveland Community Services District (GCSD) is committed to providing safe, reliable water and sewer services to our community. As part of the multi-year rate plan adopted by the GCSD Board of Directors on June 18, 2025, following the Proposition 218 process, the Fiscal Year 2026–2027 water and sewer rate increases became effective on July 1, 2026.

These annual adjustments help ensure the District can continue to operate, maintain, repair, and improve its water and sewer infrastructure while providing reliable service to our customers. For more information or to view the current rate schedules, please visit our website at www.gcsd.org or contact the District Administration Office at (209) 962-7161.

Water Fixed Rates

Meter Size	Monthly Water Fixed Rates
5/8 x 3/4 inch	\$57.40
3/4 inch	\$57.40
1 inch	\$88.53
1 ½ inch	\$166.36
2 inch	\$259.75
3 inch	\$508.79
4 inch	\$788.97
6 inch	\$1,567.24

Water Consumption Charges

Variable Charges for All Water Consumed (Billed by the Gallon)	
0 to 3,300 Baseline Usage	\$0.01571
> 3,300 Peak Usage	\$0.03049

Water Capital Improvement Projects (CIP) Debt Service

CIP Improvements	FY 2026-2027
5/8 x 3/4 Inch Meter	\$15.57
3/4 Inch Meter	\$15.57
1 Inch Meter	\$24.90
1 ½ Inch Meter	\$40.47
2 Inch Meter	\$54.48
3 Inch Meter	\$96.41
4 Inch Meter	\$121.39

FISCAL YEAR 2026-2027 SEWER RATES

Residential Sewer Fixed Rate

Customer Type	Monthly Sewer Fixed Rates
Residential	\$169.02

CIP Improvements	FY 2026-2027
Past Sewer CIP Improvements**	\$11.25
Future Sewer CIP Improvements	\$12.40

****Not applicable to Groveland/Big Oak Flat accounts not tributary to Lift Station 7.**

Monthly Fixed Rate for Water and Sewer

This charge provides for the fixed annual costs of operating the buildings, grounds and facilities of the District, irrespective of the quantity of water used or occupancy status.

Water and Sewer Consumption Charges for Water and Sewer

This charge provides for the variable costs of operation and maintenance of the systems, directly proportional to the amount of water used.

Capital Improvement Projects (CIPs)

Capital Improvement Projects (CIPs) are major investments in the District's water and sewer infrastructure that help ensure safe, reliable service for years to come. These projects include replacing aging water and sewer lines, rehabilitating storage tanks and pump stations, upgrading treatment facilities, improving fire hydrants, and constructing new infrastructure to meet regulatory requirements and the community's future needs.

While routine maintenance keeps existing systems operating day to day, CIPs address larger improvements that extend the life, reliability, and resiliency of the District's utility systems.
