Subject: Groveland Water System Project

The proposed Project site is not located on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5. An updated search was conducted in March 2024¹. The nearest location is a closed mine site located at the corner of Cedar and Elm Streets in Tuolumne, over ten miles to the north. The State Emergency Response Unit conducted the removal of approximately 100 cubic yards of arsenic, mercury, and lead contaminated soil, and the removal of 80 cubic yards of mine debris and brush. Cleanup status is certified as of 6/30/1999. The project is not impacted by the facility and as such, there is no impact.
